HARD SKILL

- .Net
- C# Advanced
- Html, CSS
- RESTful API
- LINQ, PostgreSQL, MySQL
- FluentAssertions, Moq
- DeepCloner,
- Git/git-hub
- Entity Framework
- ASP.Net Core

SOFT SKILL

- Problem-Solving
- Debugging
- Multi-tasking
- **Communication**

WORK EXPERIENCE

Open-source contributions

Cashoverflow (2023.02.01-2023.05.01)

- Together with the CashOverflow team, the CashOverflow website was created based on the "The Standard" architecture.
- We used Test-Driven Development (TDD) to create a project called "CashOverFlow" that helps developers who want to work in the industry in Central Asia gain access to important information.
- I have gained teamwork experience in teamwork, skillful use of Version Control Systems (VCS), Continuous Integration/Continuous Deployment (CI/CD) processes and Unit Testing.

Tarteerb

Tarteerb.uz (2023.05.01 - 2023.07.01)

- One of the most important areas that I actively focus on is "The Standard" architecture, which allows me to build robust and scalable software that meets the highest quality and reliability standards.
- In addition, I work closely with the team to collaborate effectively and make sure we're all on the same wavelength when it comes to project goals and deadlines.

HR Management System Project

HR Management System (2 month)

- Developed a comprehensive HR management system using ASP.NET Core and Entity Framework. Implemented user authentication, employee data management, and leave management functionality. Utilized responsive design techniques to ensure seamless access from various devices. Designed custom reporting features for performance tracking and analytics. Integrated email notifications for various HR processes, such as leave approval and onboarding. Implemented role-based access control to ensure data security and compliance. This description highlights the key aspects of the HR project you worked on, showcasing your skills and accomplishments in a similar way to the e-commerce website project
